## INTRODUCTORY NOTE.

---

1. Village lists of the Districts and Taluqs of Hyderabad State are published after every decennial population census and serve as reliable guides for future Census Operations.

2. As the village forms the basic unit for all administrative purposes, and also for various kinds of Government and Public enquiries great care has been taken to make these lists as authentic and informative as possible.

3. In addition to detailed information for each village, these lists also contain taluqwar data in the form of District Summaries divided into two parts. Part A shows the population of each taluq grouped into different sizes of villages, and the total inhabitants in each class of villages, while part B classifies the population of the taluqs according to main communities, languages and literacy.

4. The exact number of villages in each taluq and as well as their correct names have been ascertained from such authentic sources as the village 'Shetwars' the 'Administration Schedules' of Tahsils, Survey of India Map, and the maps prepared by the Hyderabad Settlement Department.

5. Irrespective of their Ilaqa, Diwani or Non-Diwani, figures are given villagewar for each taluq. A summary appended at the end of each Taluq list contains a statement showing consolidated figures of Diwani and Non-Diwani ilaqa.

6. An added feature of these lists is the district and taluq maps. The Survey of India Map as well as the Taluq maps prepared by Hyderabad State Survey and Settlement Department are usually beyond the reach of public workers and even Government servants. This long-felt need of a directional chart of areas comprising the unit of civil administration will now be met to a large extent by the maps included in these lists.

The District Map with its demarcation of taluq boundaries gives the names of places with a population of 5,000 and over.

The Taluq maps are reproductions of Settlement maps on a smaller scale. All the physical features shown in the originals have been retained in these copies, and additions, such as zoning, segmentation and numbering of villages have been introduced so as to make the maps more useful for administrative and other purposes

### III. *Talug Maps:—*

1. Maps are divided into 'Zones' (Circles) and 'Segments' (Circles divided into four equal parts).

Numbering of zones begins from the inner circles and proceeds in sequence as they go outward.

The numbering of segments is done in clock-wise order, and so also the numbering of villages

The zone, segment and village number of facilitates reference.

2. Each zone covers an area of six miles radius; thus facilitating the calculation of distance of a village from the taluq headquarters.
3. Places having a population of 2,000 and over are marked with their names as well as their serial numbers, while those having less than 2,000 population bear only serial numbers.
